Rocks

Rocks, It was cold and bad here over the week-end.

Most of the farmers have finished selling tobacco.

Mrs. C. W. Baldwin was operated on at the Lynchburg General Hospital last week.

R. L. Jennings is back in the Virginia Baptist Hospital.

Mrs. Raymond Kress is at the bedside of her father, R. L. Jennings.

Mrs. Jim Frank Ranson is up after a recent illness.

Rev. W. H. Elder has pneumonia, and Mrs. W. H. Elder has the flu.

Mrs. Walter Ranson was visiting her granddaughter, Lisa Carroll Mitchell at Appomattox last week, who was sick.

Mr. and Mrs. J. Palmer Ranson, Jr., of Norfolk, were over - night guests here last Wednesday.

A large crowd attended the Paulette funeral on Wednesday. The flowers were beautiful.

Quite a few are sick around here. We hope they will soon be out.

Mrs. R. J. Paulette, of Evergreen spent the week-end with Mrs. Mildred Inge and Mr. and Mrs. Toby Inge and family.

Friends here are sorry to hear that Dr. Carl A. Collins Jr., is sick in a hospital in Abingdon.

Mr. and Mrs. Buddy Thompson, of Lynchburg, spent the week-end here with her parents, Mr. and Mrs. Otis Ranson.

A house warming was given Mr. and Mrs. Auldin Roach on Saturday night. They received many nice gifts.

Mr. and Mrs. James Thackston, of High Point, N. C., were here over the week-end and to attend the funeral of Mrs. Emma Thomas today.

RISING USE OF POWER NOTED BY VA. UTILITIES

Rising industrial and commercial power use was the major factor in an 11.2 per cent increase in sales by Virginia electric utility companies in 1959.

The electric companies report total sales of nearly 9.5 billion kilowatt hours to ultimate consumers in Virginia last year against 8.5 billion KWH in 1958. These figures do not include sales to other utilities and company interchanges.

Industrial and commercial power sales led all other classifications with an increase of 12.8 per cent in 1959, according to a report issued by H. Atwood Hitch, president of the Public Utilities Association of the Virginias, and vice president of Virginia Electric and Power Company, Richmond.

Hitch attributed the increases to new and expanding industries in the state together with greater use of electric heating and cooling equipment.

"The increase in industrial power consumption last year is a healthy sign of Virginia's industrial growth," Hitch said, "although some of the growth came from more use of comfort - conditioning equipment in plants, offices and stores."

SCHOOL PUPILS TO SEE VA. ROCK SPECIMENS

Students in the secondary schools of Virginia, public and private, will shortly have an opportunity to examine 25 specimens of rock and minierals produced in Virginia and learn more about them, thanks to the Division of Mineral Resources, Virginia Department of Conservation and Economic Development.

Dr. James L. Calver, of Charlottesville, Commissioner of the Division, recently presented Governor Almond with a box containing the first set of specimens. He informed the Governor that similar boxes are being shipped to more than 500 secondary schools of the state.

The box contains 25 compartments in each of which is a sample of rock or mineral produced in Virginia, which enters into industrial uses. Each specimen is identified on the inside cover of the box, where is also displayed a small map of Virginia on which is designated the locality from which each specimen was obtained. An accompanying booklet describes each specimen, its origin, occurence and uses.

In addition to the rocks, minerals and booklet, each school is also being sent a copy of the large map, "Mineral Industries and Resources of Virginia."

The 25 specimens included in the box are: coal, gypsum, sphalerite - galena, ferruginous sandstone, dolomite, quartize, shale, calcite, manganese ore, limestone, glass sand, coquina, pyrite, unakite, nelsonite, rutile, soapstone, slate, mica, barite, marble, kyanite, amazonstone, and granite.

KNOW THE WEATHER

By E. H. Sims

Why does a cold front reach us on the surface of the earth before the edge of it passes overhead, as a great height?

Though many readers do not know it, cold air is heavier than warm air. The result is that a cold front, moveing eastward — as all of them do eventually — tends to produce a leading edge on the surface of the earth, where the cold, heavier air displaces warmer air. The warmer air rises and is pushed up the "snout," so to speak, of the eastward - moving cold front.

As we have noted before, the leading edge of a cold front slants in an opposite direction from that of a warm front. The leading edge of a warm front leans forward, while the leading edge of a cold front leans backward.

BUT MOTHER'S
BIG
HELPER IS
HOUSEPOWER

It's fun to have mother's little helpers on the job, if just for company. But it's even more fun to have HOUSEPOWER, mother's big, BIG helper that turns homemaking into a joy all over the house and all round the clock.

So why settle for less in your home? The ample electricity that modern house wiring brings keeps Electric Appliances working at their best no matter how many you turn on at one time . . . keeps lights bright and steady.

To have HOUSEPOWER you need a 100 ampere *or more* electric entrance box . . . *at least* eight regular and three heavy-duty circuits . . . and plenty of handy switches and outlets. Then Electric helpers you own now, or add tomorrow, work like the big helpers you deserve, zipping through chores in top form.

Get a wiring check-up today. See the Yellow Pages of your phone book for the name of an Electrical Contractor near you. Ask him to make a HOUSEPOWER check-up at your house. The cost of added HOUSEPOWER convenience is modest . . . gives so much full-time help for so little.

So glad to know that Mr. Martin Kraus has returned home from the hospital and is getting on nicely at his home here. We wish for this fine man a speedy get well.

Mr. Malcolm Drinkard and Mr. Jack Caldwell, Jr. motored to Staunton on Friday to bring home Donald Lee Drinkard from school for the week-end. Lee's father, Mr. Howlette, Sr., is on the sick list. We wish for him a speedy get well.

Mr. and Mrs. Clayton Drinkard, Sr., and Mr. and Mrs. Clayton Drinkard, Jr., of Lynchburg, and Mrs. Henry Beard and Lawrence visited Mr. and Mrs. E. L. Chick on Sunday.

Mr. and Mrs. Parks Jennings spent the week-end in Colonial Heights with their son-in-law and daughter, Rev. and Mrs. Charles Spain and children.

Miss Laura Carson, of Longwood College, Farmville, spent the week-end with her parents, Mr. and Mrs. C. E. Carson, Jr.

Miss Winnie Lee is expected to arrive home on Wednesday of this week from college, for a visit with her parents, Mr. and Mrs. Tilden Lee.

Mr. Carter Bondurant left last Tuesday for the Army. We all hated to see this fine young man leave us. Our best wishes go with him. May the Dear Lord be with him wherever he goes and protect him, and bring him back to his loved ones O.K. He will surely be missed in our community.

Mr. and Mrs. Clifton Drinkard and Mr. and Mrs. Howlette Drinkard, Jr., spent the week-end with Mr. and Mrs. Howlette Drinkard Sr.

Mrs. Howlette Drinkard Sr. and sons, Clifton and Howlette Jr. motored to Staunton on yesterday to take Lee back to school.

Mr. and Mrs. Lester Carson spent last Sunday with Mr. and Mrs. Rufus Burnette.

Mr. and Mrs. E. O. Showalter and Steve, of Lynchburg, spent Sunday with her parents, Mr. and Mrs. C. D. Carson.

It's always well to remember that big words do not always convey big thoughts.

Life would be much simpler if we didn't try to make people think we are what we're not.

Few people have the courage to resist the crowd, even when they know the crowd is off base.

Borrowing money to tide you over an emergency is one sure way of inviting another emergency.

Play safe — drive carefully.

Oakville

Oakville, Feb. 2.- We are glad to hear that Mr. Marshall Cunningham is coming home from the hospital this week.

Little Bill Richardson is on the sick list this week. Hope he will soon be well and back in school soon.

Mr. and Mrs. Louis Moore, Fay, Louis Walker and Ena, visited their son-in-law and daughter, Mr. and Mrs. Beryl Covington in Goldsburg, S. C. Sunday.

We are sorry that Mrs. Helen Kerns was taken to the hospital Friday. Sure hope for her a speedy recovery.

Jimmy Martin visited Thomas Lucado over the week-end.

Mr. and Mrs. James D. Marshall and Kathy and Doug spent a few days with her parents, Mr. and Mrs. Clarke Moore this week. Mr. Marshall is on his vacation.

The Home Demonstration Club will meet with Mrs. Herbert Richardson Thursday at 10:30 A. M. This will be the January and February meetings together.

Health and Beauty

Mothers who are concerned over children who eat an excess of sweets that are high in calories and low in nutrition should be interested in the Lucky Seven cooky recipe.

It is called the Lucky Seven cooky because of the seven nourishing ingredients used in it — molasses, brown sugar, rolled oats, nonfat dry milk, raisins, carrots and enriched flour. These add up to a high contribution of calcium, iron and the B vitamins with a calorie count of only fifty-six a cooky.

The cooky has a hearty, old-fashioned flavor and interesting, rather coarse texture. Children enjoy the malone or with milk.

Lucky Seven Cooky

1 cup sifted enriched flour
1-4 cup nonfat dry milk
1-2 teaspoon baking powder
1-2 teaspoon soda
1-2 teaspoon cinnamon
1-2 teaspoon nutmeg
1-3 cup shortening
1-3 cup brown sugar
1-2 cup molasses
1 egg, beaten
1 teaspoon grated lemon rind
1 cup grated carrot or raw sweet potato.
1 1-4 cups quick rolled oats.

Sift together the flour, dry milk, baking powderfi salt, soda, cinnamon, and nutmeg.

Melt shortening. Add the brown sugar, molasses, egg and lemon, rind. Stir to blend. Add to dry ingredients and stir until mixed.

Add carrots, raisins and rolled ints. Stir until well-mixed. The dough should be stiff enough to hold its shape on the baking sheet.

Drop by teaspoonful on a lightly greased cooky sheet and bake in a hot oven (400 degrees F.) for about fifteen minutes.

Impala Sport Sedan

STEP OUT IN IT

Get the quiet proof of Chevrolet's superior performance on the road—No other car in the low-priced three can match the horse-on-the-wind sensation you get from a ride in the 1960 Chevrolet. But that's not surprising when you consider to what lengths Chevy has gone to provide for your comfort at no extra cost to you. As you drive, count the ways Chevrolet has been thoughtful:

Supple Full Coil suspension—Coil springs at *all four* wheels melt bumps as no other suspension can. Taking the punch out of rough roads is their *only* function—they don't have to anchor the rear axle.

Butyl rubber body mounts—Thicker, newly designed body mounts further insulate you from the road.

Body by Fisher—Only Chevy in its field offers the polish and craftsmanship of Body by Fisher.

Foam cushioned seats—Chevy offers foam cushioned seats in *both* front and rear in all series but one.

Safety-Girder frame—X-built and not merely X-braced, the Safety-Girder frame affords greater rigidity to minimize twisting and squeaks.

Hydraulic valve lifters—Oil hushed hydraulic valve lifters reduce engine noise to a whisper.

Cushioned steering shaft—A universal joint and cushioned coupling keep those annoying road tremors from the steering wheel.

Precision balanced wheels and tires—Here again Chevy has shown concern for your comfort by eliminating vibration in this vital area—tire life is longer, too.

Easy steering ratio—Chevy's high ratio Ball Race steering takes the work out of steering for you.

Superior weight distribution—Chevy rides better, handles better and stops better because the car's weight is more equally divided between the front and rear wheels.

Wide choice of power teams—Choose from 24 different power combinations to satisfy the itchiest driving foot—more than *any* other car.
